Things to consider:

● **Topics**
  ○ New opportunities: Carbon markets, emerging technologies
  ○ Environmental impact of BAU: Aviation, shipping, fossil fuels
  ○ Solutions

● **Audience**
  ○ Level of expertise
  ○ Relevance

● **Format**

● **Beware greenwashing**
COP26 MEETING - Why So Important?

NATIONS MUST ACT NOW OR FACE TERRIBLE DISASTERS

1. World leaders are expected to attend COP26 in Glasgow, Scotland.
2. Discussions will focus on climate change and environmental issues.
3. The meeting aims to strengthen the global response to the climate crisis.
4. Poorest nations also want a fair deal and are watching the talks closely.

In August, the UN held the first big climate talks, called COP1, where governments, especially from developing countries, voiced their concerns about addressing the global climate crisis.

In August, the UN held the first big climate talks, called COP1, where governments, especially from developing countries, voiced their concerns about addressing the global climate crisis.

The world is watching COP26 in Glasgow to see if the nations, especially from the most affected countries, can agree on a plan to reduce emissions and prevent further global warming.

The United Nations says this is the last chance to avoid a climate catastrophe. Let's hope for success in Glasgow!
